

ABOUT TRAVELXP

As you already know, Travelxp is every customer's favorite travel brand of choice. At our heart, we have always believed that there is one world, a beautiful and enigmatic world, and there should be no boundaries to our knowledge, our explorations, our ideas, our memories and our capabilities to create truly beautiful journeys, companies and associations.

Over the last 10 years, Travelxp has built some industry leading, pioneering travel brands. Starting off with our marquee travel channel in India, we set off to create some really admirable travel content, which highlights the beauty our world possesses, with plentiful destinations, cultures, cuisines and heritage. Over the years, we have expanded this into the world's leading travel television channel, broadcasting in over 50 countries, to over 100 million+ homes (that's almost 500 million people!!).

Travelxp today is synonymous as the gold standard of travel content, shooting stunning 8K HDR travel content, and displaying not only its love and admiration amongst the people, but also amongst the technical wizards, representing the world of travel in the cliques of the content production elite, as the pioneers behind 4K HDR and now, 8K HDR content.

We have also begun investing into the other fields of travel, bringing the same traveler & quality centric mindset into travel bookings. Travelxp.com, launched during a similar time, has now become a pivotal point of focus for the Travelxp group. Travelxp.com aims to cater to customers who want a truly curated, integrated travel experience with the industry's most reliable travel advisors. Creating such a platform, bringing travel enthusiasts together, and helping people experience travel in the way we truly believe it is meant to be, will be a main goal of Travelxp.com's current yearly plan.

Additionally, Travelxp is always on the lookout for new opportunities. We recently started our second ifestyle channel, Foodxp in the UK, curating the best of Indian food, created by some of India's top master chefs, including Sanjeev Kapoor, Harpal Singh Sokhi, Neha Shah, Mirvaan Vinayak among others.

Let's work together on creating one world with no boundaries!

JOB PROFILE – Frontend Developer

About the Role:

We are searching for an organized, ambitious Front-end Developer with hands-on experience in Javascript, Reactjs, HTML, and CSS.

If you- re interested in creating a user-friendly environment by writing code and moving forward in your career, then this job is for you. We expect you to be a tech-savvy professional, who is curious about new digital technologies and aspires to combine usability with visual design.

Ultimately, you should be able to create a functional and attractive digital environment for our company, ensuring a great user experience.

Responsibilities and Duties:

- Your primary focus will be on developing user interface components in React.js.
- Provide website maintenance and enhancements.
- Develop functional and appealing web- and mobile-based applications based on usability.
- Creating high-performance and design-rich websites as part of a product team.
- Maintain graphic standards and branding throughout the product's interface
- Using and learning React and React Native while part of the team to create products for Travelxp in the domain of travel e-commerce and OTT.
- Working simultaneously with other front-end developers using version source control software such as GitHub, Bitbucket.
- Evaluating and integrating new technology additions to make our products better with time using industry-leading technologies and updated libraries.
- Working with other team members and the team lead using Project Management Tools and Version Source Control to create industry-leading technological products.
- Keeping up to date with market advancements in the fields of front-end development, JavaScript.

Skills required:

- 0 - 2 years of experience in using Javascript, Reactjs, HTML, and CSS.
- Excellent verbal communication skills.
- Good problem-solving skills.
- A working understanding and practical experience of using HTML, CSS, and JavaScript for personal or professional projects.
- Knowledge and implementation of Restful API.
- Knowledge of Native languages (Java, Objective - C, Swift) will be an advantage.
- A basic or advanced understanding of React and/or React Native, which would be the JavaScript library that we use to create websites and mobile apps.
- Experience using version source control tools such as GitHub, Bitbucket, etc, and working with branches, commits, and push/pull requests.
- Working knowledge of the entire product lifecycle.
