

Job Description

Role	Software Development Engineer I- Backend
Location	Bangalore
Reporting Manager	Head of Engineering- Backend
Department	Product, Design and Technology
Website	https://www.bewakoof.com

Our Story:

Established in 2012, Bewakoof.com is a brainchild of two stubborn IITians who followed their hearts and chose to become entrepreneurs. They looked at fashion differently and believed that fashion can be consumed with lots of fun. Bewakoof.com has always been a for-the-people brand, understanding consumers' sense of fashion and delivering the best.

Our Vision:

We offer creative products delivered through delightful experiences, relatable and entertaining content while ensuring quality and affordability.

The company has a revenue run-rate of 250crs, growing more than 100% Y-O-Y, and has managed to be the sole profitable player in the online shopping space in India. We plan to **grow 10x in the next 4 years** with a vision to create India's largest Youth Fashion Brand, and this is your chance to be a part of our exciting journey!
