

Software Developer – Cimpress India

About Cimpress

Cimpress Founded in 1994, Cimpress is now a group of 12+ most innovative mass customization e-commerce businesses in the world such as Vistaprint, National Pen, Pixart Printing, Exaprint, Printi, Drukwerkdeal, WirmachenDruck.de, VIDA operating in 25 countries with a vast product range, world class automated manufacturing capabilities, and over \$3.5 billion in revenue.

At Cimpress, we drive competitive advantage across our various businesses by investing centrally in a select few shared strategic capabilities that have the greatest potential to create company-wide value. Cimpress India is one such key strategic enterprise focused on building great teams in India across the domains of engineering, design, and artwork processing for various Cimpress businesses driving innovation.

Cimpress India began its journey in April 2017, and we now have 400+ great minds in Mumbai and Bengaluru working across various areas of software engineering as well as graphic design and prepress services for several different Cimpress businesses. With multi million customers, our teams are constantly challenging themselves to empower our businesses to be more entrepreneurial through our cutting-edge technology solutions. Our teams work directly with our businesses around the world to solve complex customer demands through e-commerce and manufacturing capabilities. Our primary engineering focus is to build products that are scalable and provide an impact and we need great talent like you to come and help us succeed.

Why You should Join

Being at Cimpress means that you don't see work as just a building, a desk or a manufacturing floor. You see it as a chance to take a step forward in your career journey – and your life. We strive to give you everything you need to learn, grow, and succeed. Through innovation, collaboration, and perpetual exposure to what's next, we're always pushing boundaries and broadening our horizons. We embrace the chance to operate outside of our comfort zone to discover what we're capable of. Some might call that a challenge; we just call it another great day at work.

- Collaborative workplace with bunch of brilliant minds as your colleagues, peers and coworkers.
- Sponsorship for entrepreneurial mindset and high ownership
- Explore your career opportunities while actively learning and bridging the gap between your education and applying your skills.
- Tremendous opportunities for learning new technologies and encouragement for innovation and creativity.
- Competitive healthcare benefits and a lot more

We're Remote-First

In 2020, Cimpress adopted a Remote-First operating model and culture. We heard from our team members that having the freedom, autonomy and trust in each other to work from home and, the ability to operate when they are most productive, empowers them to be their best.
