

Software Test Engineer

The opportunity:

We are looking for a talented and ambitious Software Testing Engineer to join the Product-Editage Tech team who will be responsible for testing as well as suggesting solutions to identified quality problems.

Responsibilities:

- Candidate must have experience/knowledge of testing of web-based and mobile applications, using manual and automated tests
- Should have a good understanding of Software Testing Life Cycle
- Demonstrate the ability to derive the Test Scenarios from the Business Requirements.
- Demonstrate a working understanding in Test Design and writing detailed test cases based on user scenarios.
- Responsible for performing test execution and test analysis
- Strong proficiency in Functional / Regression / Retesting / UI / Usability / Cross Browser testing.
- Good exposure to Automation testing tools and concepts. (Basic level)
- Good to have knowledge on Defect & document Management tools such as JIRA, Confluence

Requirements (Desired skills & experience)

- Total Experience of 2 - 4 years should have strong manual Web/Mobile Testing and API Testing experience.
- Automation Testing (Selenium, BDD) and SQL Testing would be an added advantage
- Strong knowledge of SDLC and software QA methodologies, tools, techniques and processes
- Strong analytical and problem-solving skills.
- A strong team player with excellent communication skills (both verbal and written) and the ability to communicate both technical and non-technical information
- Experience in writing clear, concise and comprehensive testing documentation
- Experience working in an Agile/Scrum development process and environment

Job Location:

Remote, anywhere in India

Remuneration:

300000 – 700000 per annum

About us:

Cactus Communications is a technology company accelerating scientific advancement. We collaborate with researchers, universities, publishers, academic societies, and life science organizations. We offer AI-powered scholarly publishing solutions for journals and researchers; editorial, translation, education, and training solutions for researchers; strategic and tactical scientific content solutions to global life science organizations; and solutions for science dissemination and engagement with peers, public, and policymakers for wider research outreach. We also incubate seed-stage and early-stage startups that share our mission to solve global problems with science and technology solutions. We have offices in London, Princeton, Singapore, Beijing, Shanghai, Tokyo, Seoul, Aarhus, and Mumbai; a global workforce of over 3,000 experts; and customers from over 190 countries.

Know about our Culture:

The CACTUS culture is the glue that binds us together as we work towards the same shared goal.

*We are “One CACTUS”. You are a Cactizen regardless of where you work.
We take pride in our diversity, respect each other, and call out bias whenever we see it.
We focus on outcomes rather than formalities. Everyone is on first-name basis.
We are selective and hire only those who share our vision and values*

CACTUS has always been driven by its culture. It sets us apart and attracts people who want to maximize their potential at work and in life. It describes our unique work practices in three aspects: People & Life, Performance & Career, and Business & Leadership.
