

SWIGGY

About Swiggy

Swiggy is India's largest food ordering and delivery platform , founded in 2014. At Swiggy ,we build product and solution that redefine the food ordering and delivery space in India , every single day.

Recently Swiggy Tech has launched its beta program called Swiggy GigNow where in we are hiring exciting tech talents for freelance gig roles across various experience bands.

What is Swiggy GigNow?

Swiggy GigNow is a beta program to attract Engineers and STEM candidates for 3, 6, 9 or 12 months program which will convert to permanent role if performed well by the candidate.

This is an incredible opportunity for engineers to work directly with Swiggy as part of short-term or long-term roles to solve technical problems across the marketplace, and students can use this opportunity for their internship programme and have a better chance of converting it into a pre-placement offer..

What are we looking for?

We're looking for exciting tech talent stacks like Java, Go, React, React Native, Angular, Android, iOS, App Automation, DevOps, SDET, and mobile testers.

We welcome anyone who can write good code and solve complex problems and wants to spend the next few months on short-term projects or internships.

We prefer M.Tech CSE students and B.Tech CSE final year students for the internship programme.

How would it benefit students?

As swiggy being major food delivery giant with valuation close to \$5 Billion the students would get chance to work on projects in a fast paced environment where they will solve complex problems and that will help them to upskill them and give edge over others and very good stipend would also be provided.

Students will gain valuable peer learning experience in an environment where more than 200 people are already working under this programme.

Students will have a better chances of placement offer even before the placement season starts if they perform well in the given duration.

Students who could not get the opportunity to work after their final year will have chance to bridge the gap.

Where to apply?

Interested candidates can apply through the link attached below ,incase if anyone has any questions they can mail their queries to - abhishek.bhaduri@swiggy.in
