Job Description

Role	Software Development Engineer I- Frontend
Location	Bangalore
Reporting Manager	Head of Engineering- Frontend
Department	Product, Design and Technology
Website	https://www.bewakoof.com

Our Story:

Established in 2012, Bewakoof.com is a brainchild of two stubborn IITians who followed their hearts and chose to become entrepreneurs. They looked at fashion differently and believed that fashion can be consumed with lots of fun. Bewakoof.com has always been a for-the-people brand, understanding consumers' sense of fashion and delivering the best.

Our Vision:

We offer creative products delivered through delightful experiences, relatable and entertaining content while ensuring quality and affordability.

The company has a revenue run-rate of 250crs, growing more than 100% Y-O-Y, and has managed to be the sole profitable player in the online shopping space in India. We plan to **grow 10x in the next 4 years** with a vision to create India's largest Youth Fashion Brand, and this is your chance to be a part of our exciting journey!

What are we looking for?

Bewakoof.com is looking for a Software Development Engineer-I Frontend with a specialized focus on implementing visual and interactive elements that users would like to engage and feel the ease of the site. We are looking for people with an agile mind-set, attitude to learn continuously and solid software craftsmanship to join our cross-functional product development team. The role requires you to work alongside the Business, Product and Engineering teams to solve complex development related issues.

Roles and responsibilities:

- Develop new user-facing features
- Build reusable code and libraries for future use
- Optimize application for maximum speed and scalability
- Collaborate with other team members and stakeholders
- Build Responsive websites

Must haves:

- A degree in Computer Science, Engineering or relevant experiences.
- Strong problem solving and analytical skills.
- Built quality apps in React Native/ReactJS

Nice to have:

- Knowledge of Node.JS and GraphQL will be a plus.

Key Competencies:

- Proactive & Self Driven Approach
- Solving Problems Creatively
- Learning Agility
- Working Well With Others
