Position: Software Developer

About DeltaX

DeltaX is a Data-Driven Digital Advertising Platform built for Agencies and Advertisers to optimally buy, track, attribute and report media across search, social media, display RTB, Mobile, Video and other media channels. (www.deltax.com)

Job Description

DeltaX is looking for fresher who are self-driven problem solvers at heart and have a strong base of computer science fundamentals. We expect you to know at least one web-based programming language (eg: PHP, .NET MVC, Node.js, etc.) and are able to wow us in our assignment. Selected candidates will go through a training boot camp for 2 months to transform themselves into Full-stack Developers with expertise in C#, .NET Core or JavaScript (Vue.js framework).

Engineering Stack + Culture

Our core platform is built with a polyglot stack. We extensively use ASP.NET MVC 4 with C#, REST APIs, HTML5 and JavaScript to build a modern data intensive web application. Our application is multi-lingual and supports multiple currencies (i18n and l18n). We have written a suite of Services that integrate with API partners like Google AdWords, Facebook Marketing and Bing Ads.

We work at web-scale and also host our ad serving, tracking and attribution stack on the AWS cloud which is horizontally scaled and fail-safe. The code is powered through our custom written Node.js servers and leverage a NoDB pattern to collect logs across multiple geographical locations.
