"Celebrating India and Indianness."

Mirraw began its journey in 2011 with Shailesh and Anup returning to India to set up their own entrepreneurship dream - an online venture where they were technical and passionate about growth. With that they envisaged creating a large marketplace platform that enabled creators of the world to come online and sell their products.

Identifying a distinct gap in the market - where unique designs sold by creative small and mid-scale designers and manufacturers, Mirraw started off as an online ethnic jewellery brand, with time we have grown our portfolio to include other categories such as Sarees, Lehenga's, Salwar Kameez's and other apparels and later moved into home furnishing as well. Our focus today is on differentiating our experience for our consumers and also ensuring the best quality from our vendors.

With over 5 lac listed products, 5 million and counting customers worldwide, our mission is to bring the world's best ethnic designs to our customer's doorstep. Based out of Fort, Mumbai, Mirraw brings handpicked designs in ethnic jewellery, apparels, accessories & more. With a great fan following in India, US & Europe, Mirraw **aspires to be largest and most trusted brand to deliver the Indian Ethnic experience to the world**.

We are looking for a Software Developer who can imbibe these principles and as an integral piece of the puzzle, be responsible to work on the design, development and testing of high-quality software that is aligned with user needs and business goals.
